### **Re-order Information:**

You have just purchased the promotional BC2-CME kit for \$275.00 plus shipping. The retail value of this kit is \$460.00 plus shipping. When you go to re-order this kit, it will be at the full retail price of \$460.00 plus shipping. You may obtain a \$100.00 discount on all subsequent kits ordered by participating in our Feed-Back Program. If you agree, we will email you the BC2/CME Program Questionnaire which you will fill out after each 30 days of product use. Thank you. Mark L. Gordon, MD.

In May 2019, we began a program using Clear Mind & Energy (CME) and Brain Care II (BC2), as the only products to address those clients with symptomatic Traumatic Brain Injury. Understanding that Brain Care II contains 6 key natural components that each decreases inflammation while Clear Mind & Energy contains another 6 key natural components that deal with energy and the reduction of inflammation.

There is only one component common to both products - EGCG. It is our goal to be able to utilize these two products as the foundation for helping those with TBI, Concussions, CTE, and other neuroinflammatory conditions. In the past two months, we have received patient documents showing a 30 - 70% improvement with the combination of BC2 and CME.

Our plan is to make these two products available to the general public without laboratory blood testing during a 3 months pilot program. If during the initial 3 months of product use the client has improvement, then the need for the laboratory testing is not mandatory but is highly suggested.

If the client does not achieve a significant improvement within those 3 months, it is highly recommended that the client becomes a patient of the Millennium Neuro-Regenerative Centers in Encino, California or one of our affiliates. At that point you will have a comprehensive laboratory evaluation to better understand the cause of your less than optimal response and a higher level of treatment.
